

Preparing for your Family session

Below please find some thoughts on this particular session and how to prepare for success!

err

- This session will last 1.5-2 hours, with plenty of time for breaks where needed.
- I love including baby or family hobbies for this session. Get creative and share your thoughts via email or on the client portal.
- Coordinate your outfits opposed to matching. Please request the "How to dress for your session" blog post guide if needed.
- In general I will have your family interacting with one another. There will be lots of tickling, laughing, and movement.
- Happy to create sibling and individual images of your little one(s)!
- Please refrain from bringing your cell phone out to entertain your children. This does NOT create natural feeling expressions or reactions from the majority of children.

“

One whole year of awesomeness!
