

Preparing for your Sitting session

Your session will last approximately 1-2 hours, depending on your little one. Below please find some thoughts on this particular session and how to prepare for success!

- The timing for this session is when your baby is able to independently sit on their own.
- For most babies this session falls around 6-8 months of age.
- The personality of your baby is what I am going to capture! Please feel free to share thoughts prior to your session on their favorite items, some which may be appropriate to incorporate into the session.
- I love including baby or family hobbies for this session. Great creative and share your thoughts via email or on the client portal.
- Feel free to bring 1-2 favorite outfits. Please be sure to attach images of them onto your questionnaire!
- This is a great time to capture your baby in their birthday suit! Don't feel like you need to bring an abundance of outfits.
- Please consider doing family images at this session, as your baby is full of personality at this age.

“Watching you grow...
is my favorite adventure”
